

Certainty of blaming and defending dissent

Low versus high agreement over the full observed period. Equal-post estimates with 95% post-bootstrap CIs.

Low: $0.40 \leq \text{final YA share} \leq 0.60$ (ties excluded). High: ≤ 0.20 or ≥ 0.80 . n = posts (blaming / defending).

† AITAH high-agreement defending has only 15 posts. Hollow markers flag this small cohort; interpret cautiously.
